Ripped from his motorcycle by Colombian rebels and robbed of everything, adventure motorcyclist Glen Heggstad journeyed through South America, and the trip became a nightmare as he was forced to march through strange jungles carrying heavy equipment with assault rifles at his back. Even with all the hand-to-hand and sophisticated combat training Heggstad possessed, this chronicle shows that it was his shrewd thinking, precise planning, and a "do-or-die" last act of desperation that eventually secured his freedom. The shocking personal tale of an unimaginable journey through Central and South America, this travelogue details one man's capture by Colombia's rebel National Liberation Army and the eventual realization of his dream to complete his journey.

This is the book for the motorcyclist who wants to do it right! The Motorcycle Safety Foundation's Guide to Motorcycling Excellence is the most complete and authoritative guide to motorcycle safe-riding techniques and strategies. More than one million students have completed courses developed by the Motorcycle Safety Foundation, and this book is the culmination of what this leading rider-training organization has learned about teaching students of all ages and experience levels. It is the perfect refresher for anyone who has taken an MSF class and it will be an eye-opener for those who have not yet taken a formal training course. In a clear, engaging style with detailed diagrams and extensive full-color photographs and illustrations, the book covers rider attitude, proper gear, basic and advanced street skills, and performance, as well as skill maintenance and troubleshooting. Topics include how to stop quickly when necessary; avoiding traffic hazards; applying evasive maneuvers; countersteering for better control; traveling safely and skillfully in a group; identifying and fixing mechanical problems; riding smoothly at high and low speeds; maintaining momentum in off-highway riding; and much, much more. The Motorcycle Safety Foundation's Guide to Motorcycling Excellence is a remarkable source of riding wisdom and the definitive reference for the sport.

The definitive, easy to understand and breakthrough guide on how young people can take their limited first income and turn it into a small fortune by the time they turn thirty from an expert financial planner. Most people know that there are 70 million Baby Boomers in America today....but what is less known is that there are approximately 100 million people in America between the ages of 16 and 30. This generation has just entered, or will soon be entering the work force. And they have no idea how to invest, save, or handle their money. Young people today come out of school having had little or no formal education on the basics of money management. Many have large debts from student loans looming over their heads. And many feel confused and powerless when their pricey educations don't translate into high paying jobs. They feel that their \$30,000-\$40,000 salary is too meager to bother with investing, and they constantly fear that there will be "too much month left at the end of their money." Douglas R. Andrew has shown the parents of this generation a different pathway to financial freedom. Now Doug and his sons, Emron and Aaron - both of whom are in their mid-20s - show the under-30 crowd how they can break from traditional 401k investment plans and instead can find a better way by investing in real estate, budgeting effectively, avoiding unnecessary taxes and using life insurance to create tax-free income. With the principles outlined in Millionaire by Thirty, recent graduates will be earning enough interest on their savings to meet their basic living expenses by the time they're 30. And by the time they're 35, their investments will be earning more money than they are, guaranteeing them a happy, wealthy future.

Jonny Bealby was devastated when his fiancée Melanie died unexpectedly while they were travelling in Kashmir. Two years later, still heartbroken and utterly disillusioned, he took on the challenge of a lifetime. Setting out with only his motorbike for company, he began a daring and dangerous journey around the African continent in a desperate attempt to unearth some meaning in his life. Bittersweet, bold and beautifully told, *Running with the Moon* is a tale of true love and loss, of

exploration, adventure and courage.

This comprehensive resource provides readers with the tools necessary to perform analysis of various waveforms for use in radar systems. It provides information about how to produce synthetic aperture (SAR) images by giving a tomographic formulation and implementation for SAR imaging. Tracking filter fundamentals, and each parameter associated with the filter and how each affects tracking performance are also presented. Various radar cross section measurement techniques are covered, along with waveform selection analysis through the study of the ambiguity function for each particular waveform from simple linear frequency modulation (LFM) waveforms to more complicated coded waveforms. The text includes the Python tool suite, which allows the reader to analyze and predict radar performance for various scenarios and applications. Also provided are MATLAB® scripts corresponding to the Python tools. The software includes a user-friendly graphical user interface (GUI) that provides visualizations of the concepts being covered. Users have full access to both the Python and MATLAB source code to modify for their application. With examples using the tool suite are given at the end of each chapter, this text gives readers a clear understanding of how important target scattering is in areas of target detection, target tracking, pulse integration, and target discrimination.
