Information technology governance is a subset discipline of corporate governance, focused on information technology and its performance and risk management. The interest in IT governance is due to the ongoing need within organizations to focus value creation efforts on an organization's strategic objectives and to better manage the performance of those responsible for creating this value in the best interest of all stakeholders. It has evolved

from The Principles of Scientific Management, Total In the Governance, Risk and Compliance market, there are plenty of point solutions for Risk and Compliance, but there is a lack of attention paid to Governance solutions. Governance is the practice of raising the right information to the right leaders, board and stakeholders so they can ask the right questions and steer organizations.

At the forefront of the field, the authors of this volume draw from years of research and advising corporate clients to present a comprehensive resource on enterprise governance of IT (EGIT). Information technology (IT) has become a crucial enabler in the support, sustainability and growth of enterprises. Given this pervasive role of IT, a specific focus on EGIT has arisen over the last two decades, as an integral part of corporate governance.

The previous chapter provided a high-level description of the “Enterprise Governance of IT (EGIT)” concept. This second chapter starts with discussing the genesis and evolution of EGIT, both in academic research and

practice. Then, this chapter introduces mechanisms that can be used to implement EGIT in practice.

Enterprise governance of IT is a relatively new concept that is gaining traction in both the academic and practitioner worlds.
