You'll learn how to use financial and accounting information across borders, and make more informed decisions in an increasingly complex international business environment. Special attention is given to the experience of the European Union and Australia in adopting IFRS in 2005. * A web-based International Accounting Practice Problem, which helps students see how to apply IFRS to a set of transactions. * Brief, user-oriented examples called Strategic Decision Points at the beginning of each chapter. * Expanded end-of-chapter material, including more discussion questions and exercises. * New cases (two per chapter) on the web. * Accounting for foreign exchange is now covered in two chapters.
