**Bloom's taxonomy | education | Britannica**

Bloom's Taxonomy was developed more than 60 years ago; it was not substantiated by any research at the time and continues to be lacking in evidence for its effectiveness. The idea that learning is a linear process is also considered by many to be problematic as it gives the impression that some skills are more important and more valuable than others.

**What is Bloom's taxonomy? How do teachers use it?**

Bloom's Taxonomy was created by Benjamin Bloom in 1956, published as a kind of classification of learning outcomes and objectives that have, in the more than half-century since, been used for everything from framing digital tasks and evaluating apps to writing questions and assessments.

In Bloom's Taxonomy, there are six levels of skills ranked in order from the most basic to the most complex. Each level of skill is as-

sociated with a verb, as learning is an action. As a teacher, you should ensure that the questions you ask both in class and on written assignments and tests are pulled from all levels of the taxonomy pyramid.

What is Bloom's Taxonomy? In 1956, Benjamin Bloom with collaborators Max Englehart, Edward Furst, Walter Hill, and David Krathwohl published a framework for categorizing educational goals: Taxonomy of Educational Objectives. Familiarly known as Bloom's Taxonomy, this framework has been applied by generations of K-12 teachers, college and university instructors and professors in their teaching.

**Question Stems for Each Level of Bloom's Taxonomy**

Bloom's Taxonomy of Learning Domains. Bloom's Taxonomy was created in 1956 under the leadership of educational psychologist Dr Benjamin Bloom in order to promote higher forms of thinking in education, such as analyzing and evaluating concepts, processes, procedures, and principles, rather than just remembering facts (rote learning). It is most often used when designing educational, training ...

As Bloom's taxonomy is a hierarchy of progressive processes ranging from the simple to the complex, in which it is necessary to first master those lower down the pyramid before being able to master those higher up, the framework promotes what Bloom termed 'mastery learning'.
